*Innovative acquisition and capital strategies for your  
long-range energy needs*

**Syska Hennessy Group**

Being responsive to your energy needs and  
taking bottom-line responsibility for the results

#### **Understanding your business**

Facilities managers are charged with the responsibility of keeping their companies ready to conduct business 24 hours a day, 365 days a year. Expanding business plans and increasing pressures for cost control put a significant strain on the management of energy procurement and consumption. Juggling all the variables is a big job. If one ball drops, it can cost millions.

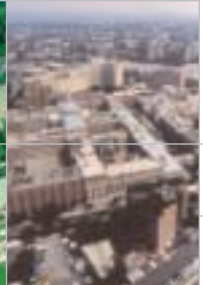

This is where Syska Hennessy can help. We study, plan, design and construct energy solutions. Our experienced professionals have a unique insight into today's (and tomorrow's) energy challenges. By understanding the business of energy, the supply and demand of power and utilities, and how to manage their reliability and costs, we help you achieve your business goals.

#### **Taking the pressure off with single-source, integrated solutions**

We take the pressure off of owners and facilities managers by being a single-source, results-oriented firm. Our Energy Services team consists of experts in commodity acquisition, capital strategies, power and utility generation and distribution and sustainable design. Working with you, we define the end result and work towards developing integrated solutions that get you where you want to be.

As engineers of building systems, we understand a facility's energy needs and the infrastructure to support it. As technology experts, we understand uptime and reliability of critical systems. As constructors, we are skilled estimators and schedulers able to minimize the time and costs from design through construction. Finally, as a national firm recognized for innovative and proven energy solutions, we can serve you at all your locations, whatever your need is.

**Responsive to your needs and accountable for results**

Syska Hennessy is committed to being responsive to your needs, and taking bottom-line responsibility for results. You will find us eager to listen, adept at understanding and proactive with ideas and improvements. Our depth of staffing and services gives you all the resources required to achieve measurably improved results: on time, within budget and without excuses.

**Our experience and passion gives you the advantage**

You've got to stay ahead of the energy curve. Outdated power grids are being further stressed by a voracious appetite for technology that requires more energy without allowances for downtime. The risks have never been higher.

Our approach is as rare as it is rewarding. We know, all too well, that successful project execution is key to achieving your business goals, and reaching them is our ultimate objective.

Our 75-plus years of experience includes professionals who are passionate about the business of energy and how they can make it work better for you. Predictably. Efficiently. Reliably.
