SYSKA HENNESSY  
GROUP

*Trusted facilities experts  
assuring government agencies  
of technical excellence, responsiveness  
and complete on-time solutions.*

**Syska Hennessy Group**

Below The Pentagon, Arlington, VA

Delivering the total resources  
to achieve superior results

**A record built on performance and professionalism.**

Syska Hennessy Group has seven decades of experience serving the needs of government agencies with technical excellence, quality and cost control, and on-time achievement of project objectives. Within the last five years, that performance has earned our involvement in government projects totaling more than \$1 billion in construction value. Over the same period, we have delivered more than \$100 million in construction as a prime Engineer-Constructor.

Performance and professionalism have produced long relationships with the Department of Defense, the Army Corps of Engineers, the Naval Facilities Engineering Command, the Pentagon Renovation Program, the Department of State, the General Services Administration, the Department of Agriculture and the Architect of the Capitol.

Our track record includes engineering, facilities management, and construction projects across a broad range of technical installations, including medical, training and administrative buildings; critical facilities and data centers; laboratories; energy plants; embassies; courthouses; and museums. We are frequently called on to develop new standards for engineered building systems; antiterrorism/force protection; and technical reliability, maintenance and operations.

**Your single source for reducing risk and shortening schedules.**

Clients benefit from our broad platform of expertise. With complete capabilities in consulting, engineering, technology and construction, we plan, design, build and operate technically superior facilities that are key to the success of public- and private-sector clients worldwide.

This depth of knowledge brings the quick thinking and skills to save money, solve problems and move your project much faster to completion. Taking full advantage of our breadth of services provides you with the turnkey ease of a single-source supplier. In addition to proven excellence in engineering, our planning, technology, construction and operational expertise enables us to predict, prevent and correct problems across the full life cycle of your facility. This long view toward maximizing building performance has led to our leadership in sustainable design and development.

**Responsive to your needs and accountable for results.**

Syska Hennessy is committed to being responsive to the government's needs, and taking bottom-line responsibility for results. You will find us eager to listen, adept at understanding and proactive with ideas and improvements. Our depth of staffing and services gives you all the resources required to achieve measurably improved results: a superior product delivered on time, within budget and without excuses.

**Accomplishing your objectives and ensuring success.**

Our approach is as rare as it is rewarding. We know well that successful project execution helps ensure the satisfaction of your end-user, and achieving that is our ultimate aim.

As standard-setters and world-leaders, our government clientele are focused to compete, advance and prevail. We take your charge as our own, instilling it in every detail of our work. In that way we consistently prove — through technically superior facilities, reliable critical systems, efficient processes and far-reaching solutions — that we are partners in your success.
